- Healthcare
- Retail
- Research Laboratories

45 Years Experience
in high hygienic environments

World-leading Fire Standards

Designed, tested and certified to meet the most stringent fire certifications. DorteK's fire rated door systems provide up to 5 hours' fire resistance.

We continuously test our doors to ensure they meet the most recent certification and test standards in each of the countries where our fire doors are installed.

DorteK's fire doors combine safety without compromising high standards of hygiene and durability. Unique to DorteK, our patented concealed intumescent strip is built into the door during the manufacturing process. This maintains a smooth, seamless profile ensuring that there are no seams or ledges where dirt and germs can gather.

The intumescent strip is activated by the heat of a fire and expands to create a sealed fire door.

We have attained fire certification across the following worldwide locations:

- US
- UK
- Europe
- SE Asia
- Australia
- China
- Middle East
- New Zealand
- Africa

We are able to offer an inherently superior product, a product which is more hygienic, more intelligent and capable of providing the ultimate fire protection.

Key Features

- ✓ Fully sealed, ultra clean construction
- ✓ Certified from F30-F300
- ✓ Concealed hygienic intumescent strip
- ✓ Standard or bespoke sizes
- ✓ Manual or automatic
- ✓ Hinged, sliding & hermetic doors
