DMF International Pty Ltd

www.dmf.com.au

Hi, and welcome to this issue of DMF's InterNEWSs, created to keep you informed of what products we can offer to assist you in improving your workplace, and solutions for your projects. **We have entered a new financial year in Australia**, and see what DMF can offer you from our extensive range to help maintain your operating conditions

DMF International Pty Ltd partners with Efaflex GmbH, IKS and DorteK Ltd, to provide the Australian market with the best door solutions, to suit a large variety of applications. From temperature and dust control, carpark security, and even machine guarding, DMF will have the solution.

DMF can supply and install specialised high speed doors, designed and constructed to suit highly clinical applications subjected to intense air pressure differences with minimal air loss. The Efaflex SRT CR range can satisfy down to ISO Class 5, and is

than any other high speed door on the market.

The DMF Series RL3000 Rapid roll door is well suited to carwash applications, and is used to control noise and overspray. Being integrated with the carwash auto control system, the door will close in readiness for the carwash to commence, and then automatically open on completion. A range of door panels and colours is available to suit your needs.
